To Whom It May Concern:

I am writing to you in support of Jason Boucher and his abilities as a GIS Specialist. Mr. Boucher is a highly motivated individual who I have found to be punctual, dependable and technically savvy.

I first met Jason in 2018 when we contracted with him to work as a GIS Specialist through Interstate Engineering to organize and implement our water system GIS information into a usable ongoing resource. Jason took our raw data from planning to development and implementation and created the framework for the GIS system we have today. I was especially impressed with his ability to deal with complex issues that come up in the day to day operation of the water system and seamlessly implement changes on the fly due to our needs changing as the implementation process progressed.

It is my opinion that Mr. Boucher is the person you need if you are looking to implement a GIS system either from the ground up or updating a current system. He is very intelligent, detail oriented and always striving to accomplish new things, three things that I know are required for success in every day GIS.

Furthermore Mr. Boucher continues to impress me with his knowledge, skill and dedication to his work. I'm sure you will find him to be the perfect detail-oriented type of person with excellent communication skills to take a technically challenging job and make it user friendly for your entire staff upon completion. Feel free to contact me if you require further information.

Sincerely

David P Brookshire
Assistant Manager
County Water District of Billings Heights
